This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THIS Work will, it is believed, supply the want, so long felt, of a Dictionary based on the etymological relations of words, and exhibiting the results of the latest philological research, at a price quite within the reach of even common Schools.

The Dictionary contains the Etymology, Pronunciation, and Meanings of Words.

The Vocabulary contains every English word, with the exception of obsolete and very rare words, and technical terms not found in general literature. It includes, however, all the obsolete words that occur *in the Bible*. Great attention has been paid to the insertion of words in Natural History, Botany, Geology, Physics, Physiology, and other sciences, which of late have become more frequently the subject of study in schools. Numerous *Phrases* have also been introduced. Each uncompounded verb has its participles placed after it, and its past tense when different from the past participle, and exceptional plurals and adverbial forms are given.

The Arrangement of the words is *etymological*, while the alphabetical order is strictly preserved by means of references. Words derived from the same root, but with different affixes, are grouped together, the first word of each group being printed with a capital initial, and the derivatives under it with a small letter, while the groups themselves are separated from each other by a space.

The Pronunciation is exhibited in the simplest manner possible. The correct sound of every word is given by being written anew phonetically, thus obviating the use of an array of marks so confusing to the pupil. The syllabication and accentuation have also been carefully attended to, and different pronunciations given in cases where authorities are divided.

The Meanings are based on the root-ideas of the words, a plan not only logically correct, but calculated to give increased vividness to the conception. The primary meaning is given first (in italics), and the secondary meanings in the order of their logical connection with the primary one, different classes of meanings being separated by colons.

EXPLANATIONS TO THE STUDENT.

Arrangement of the Words.—Every word is given in its *ical* place, printed in **Clarendon,** and there its meanings, &c. erally be found. In certain cases, however, the word is referred her, under which it is explained in its relation to words derived e same root. *Participles* are always placed after their verbs, and generally after their adjectives. When a word stands after , with no meaning given, its meanings can be at once formed ose of the latter, by adding the signification of the affix: thus the gs of **darkness** are obtained by prefixing the meaning of **ness,** *being,* to those of **dark.**

Pronunciation.—The Pronunciation is given immediately after rd, by the word being spelled anew. In this new spelling, every nt used has its ordinary unvarying sound, *none being employed more than one sound.* The same sounds are always represented ame letters, no matter how varied their actual spelling in the e. No consonant used has any mark attached to it, with the one n of *th*, which is printed in common letters when sounded as in t in italics when sounded as in *th*en. *Unmarked vowels* have heir short sounds, as in *lad, led, lid, lot, but, book.* The *marked* re shewn in the following line, which is printed at the bottom of ge—

fāte, fär; mē, hér; mīne; mōte; mūte; mo͝on.

Meanings.—The *primary meaning* of every word is given *first*, in The word *literally* (lit.) before a meaning, signifies that that is aning according to the letter, though it is not now, and may ave been, in use in the language; the word *originally* (orig.), meaning following once existed, though now obsolete.

other meanings are arranged in the order of their connection root idea, those nearer the literal meaning being placed first; y are classified in groups, separated by colons.

, before a meaning, signifies that it is used in the Bible in that sense, though it does not imply that the other meanings of the ay not also be used there.

The Etymology.—The Etymology of each word is given after the meanings, within brackets. Where further information regarding a word is given elsewhere, it is so indicated by a reference. When no etymology follows a word, this implies that its derivation is given above, under the chief word of which it is a derivative. Where the etymology of a word is *doubtful*, different opinions are given; and where *unknown*, a query [? is affixed. Under each word, the prefixes with their meanings are always stated, but not the affixes, although the force of the latter is always given under the literal meaning. A full list of Prefixes and Affixes, with their significations and roots, will be found in the Appendix.

ADDITIONAL DERIVATIONS.

Anchovy, Sp. and Port. *anchova*, Ger. *anschove*, said to be of Iberian origin, and meaning literally dried or pickled fish, from Biscayan, *antzua*, *anchura*, dry.

Capsize, the following derivation has been suggested—from *cap*, top, head, and *seize*, because it properly to move a hogshead or other vessel forward by turning it alternately on the heads.

Cue, the last words of a speech spoken by an actor serving as a hint to the next. From the letter Q which it was marked, either the first letter of L. *quando*, when, or *qualis*, what [word].

Kipper. From *kip*, a name for the cartilaginous hook of the under jaw of the male salmon, hence cal a *kipper*.

Saddler, given by Wedgwood in his Appendix as orig. a saddler and harness-maker, from Ice. *sæti* a saddle.
